PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience delivering enterprise web and mobile applications, Java/Spring Boot services, and full-stack solutions. Hands-on experience with REST integrations, Angular, and AWS-hosted systems, with ownership spanning complex defect diagnosis, implementation, and QA validation across regulated inspection platforms. Additional experience in production recovery, performance engineering, and legacy modernization.

PROFESSIONAL EXPERIENCE

Senior Software Engineer / IT Analyst Sr
Parsons Corporation | 2024–Present

- Delivered Java/Spring Boot service enhancements, REST integrations, and reporting functionality across AWS-hosted vehicle-inspection and compliance systems serving multiple jurisdictions.
- Investigated inspection state loss triggered by rapid navigation and repeated submissions in Ionic/AngularJS workflows; implemented defensive submission handling and coordinated regression validation with QA.
- Translated changing Ontario inspection requirements into application logic, including conditional form behavior, brake-assembly rules, and structural-component validation across tablet workflows.
- Extended Hawaii reporting workflows by mapping Java/Spring Boot data to JasperReports templates, separating warning fields and updating PASS/FAIL layouts; coordinated template changes and API verification with QA.

Software Development Engineer
Parsons Corporation | 2021–2024

- Built and enhanced Angular/AngularJS applications, Ionic tablet interfaces, and Java/Tomcat REST integrations for enterprise regulatory inspection systems.
- Improved reliability and usability through validation redesign, error-handling improvements, accessibility work, and production troubleshooting.

SELECTED CONSULTING EXPERIENCE

Software Development Consultant (Project-Based) | 2018–Present

Victoria Ballet Academy — Production Recovery & Performance Engineering | 2026

- Diagnosed a production PHP failure caused by incompatible application dependencies; restored a verified file/database backup and established isolated staging and controlled rollback procedures.
- Resolved legacy session behavior blocking safe caching and implemented native nginx full-page caching; reduced measured warm-cache HTML TTFB from roughly 1.6–2.5 s to 42–51 ms across five tested pages while verifying authenticated-session and admin bypasses.

Esteline.ca — Website Modernization | 2026

- Migrated a legacy AngularJS website to responsive static HTML/CSS/JavaScript, retiring the framework runtime; delivered semantic accessibility enhancements, structured SEO metadata, consent-gated tracking, and rollback-ready deployment.

TECHNICAL SKILLS

Backend: Java, Spring Boot, REST APIs, SQL, MySQL, Tomcat, PostgreSQL (projects)
Frontend: Angular, TypeScript, JavaScript, AngularJS, Ionic, HTML5, CSS3
Cloud & Tools: AWS, Git, Maven, Postman, Linux, nginx, Apache, Plesk, GitHub Actions (CI)
Reporting & Web: JasperReports, Jaspersoft Studio, WordPress, PHP

EDUCATION

Seneca College — Electronics Engineering Technology
BrainStation — Full-Stack Web Development Program
